

The **Miland E. Knapp Rehabilitation Center**, an on-site, acute rehabilitation program, has the Commission on Accreditation of Rehabilitation Facilities (CARF) accreditation to be an inpatient brain injury rehabilitation program for adults and adolescents. Outpatient care is also available at Knapp for the single and multi-service rehabilitation needs of TBI patients. The center was the first in Minnesota to be accredited as a brain injury treatment center.

The **Mild to Moderate Traumatic Brain Injury Clinic** at Hennepin County Medical Center offers a unique system of diagnosing, treating and caring for patients who are experiencing post-traumatic effects of an injury to the brain. The multidisciplinary staff is led by a physician board certified in Physical Medicine & Rehabilitation. The team includes Psychiatry, Nursing, Occupational Therapy, Speech Language Pathology, Neuropsychology and Clinical Psychology.

Traumatic Brain Injury

An estimated 1.5 million people sustain a Traumatic Brain Injury (TBI) each year in the United States. TBI can be mild (commonly called a concussion), moderate or severe.

The **Traumatic Brain Injury Center at Hennepin County Medical Center** offers comprehensive, multidisciplinary patient care, education and research to serve people who have sustained a traumatic brain injury. We provide a full range of state-of-the-art medical and rehabilitative services. Our expertise spans the entire continuum of care for adult and pediatric TBI patients, from prevention to emergency care, neurosurgery, critical care, rehabilitation and the Mild to Moderate Traumatic Brain Injury Clinic.

Each year the staff within the Traumatic Brain Injury Center cares for over 2,000 patients. We are here to provide you with nationally recognized medical expertise, advanced technology and committed, compassionate care from all members of our team.

Level 1 Trauma Center

Hennepin County Medical Center is Minnesota's first verified Level 1 Trauma Center, the highest level of trauma care. We are a regional expert in providing care to patients with TBI. Our physicians are renowned for their nationally funded research in TBI & hyperbaric oxygen, and we are staffed 24/7 in order to care for patients as quickly as possible.

What sets us apart

State-of-the-art monitoring in our **Surgical/Trauma/Neuroscience Unit**, including equipment to monitor brain oxygen and temperature, is available at all times. Neurosurgery Service Physicians stay at the hospital 24/7 to be able to respond quickly to changes in a patient's condition.

The **Pediatric Brain Injury Program** is designed to meet the needs of children and adolescents with traumatic and other acquired brain injuries, many of whom have been treated at our Level 1 Trauma Center. The goals of the program are to help each child overcome physical, cognitive and emotional challenges to reach his/her maximum potential and to provide family education and support. The program serves inpatients and outpatients, and provides evaluation, treatment and consulting services.

Our Pediatric Brain Injury Program was the first in the nation to publish guidelines for school staff addressing the needs of students with mild TBI as they return to school.
